

I am completely disgusted with the news that I've been hearing. The National Association of Broadcasters is attempting to block certain services that are offered to me through XM Satellite Radio. This is not acceptable. I pay for the services that I receive. They do not have the right to squelch the freedom of the press. I am blind, and thus the radio, like XM, is the only source that I have for news and information. I am not able to read the newspaper or watch television. Any curtailment of my right to listen to the programming offered by XM is not only a obvious violation of my right and XM's to free speech but also may be a violation of the freedom of access and a discrimination against the blind and visually handicapped. Do not allow the NAB to disallow me the only form of news, entertainment and informational broadcasts that I have to my disposal.

Thank you,

James Mertson
